Company Profile

About Us

Here at Madras Networking Company or MNC, we are a System Integration company with more than 20 years of experience in supporting various industries with their IT and IT related infrastructure. Our head office is situated in Chennai and have branches in Mumbai, Indore and many more places. We have a rich history of collaborating with leading OEMs to deploy some of the most challenging and innovating solutions.

About Us

Vision

Connecting the world through innovative networking solutions.

Mission

To provide reliable, secure, and scalable networking solutions that foster connectivity and growth for our customers.

Values

Innovation, Reliability, Collaboration, Integrity, Customer-Centricity, Empowerment, Sustainability, Excellence.

Inception

Humble beginning by a man with a dream and a road map

2003

Networking

MNC Initially specialized in networking and then expanded to other domains

2010

Cybersecurity

We prioritize delivering cutting-edge cyber security solutions

2012

Healthcare

MNC provides sophisticated, assert trackers, Patient trackers and VMS solutions

2023

Turn over during the last FY split between all our branches spread across India

9
Million
USD

2500+

2500+ Successful project Implementations all over India

200+ Unique customers supported across various industries

200+

150+

150+ staff from various departments working collaboratively

Industries Supported

We have supported several different industries and have worked with major players from the respective industries. Our major strength is understating industry specific challenges and then designing solutions around them.

Overview

Cyber Security

- Perimeter security
- Email and web security
- Application security solutions
- Endpoint security solutions
- Secure remote access solutions
- Vulnerability Management
- Log Analysis & Infrastructure Monitoring

Networking

- Passive networking
- Active networking
- Telecommunication
- Wired and wireless networking audit

Physical Security

- Access Control System
- CCTV and IP surveillance system
- Fire Alarm System
- Gas based fire suppression system

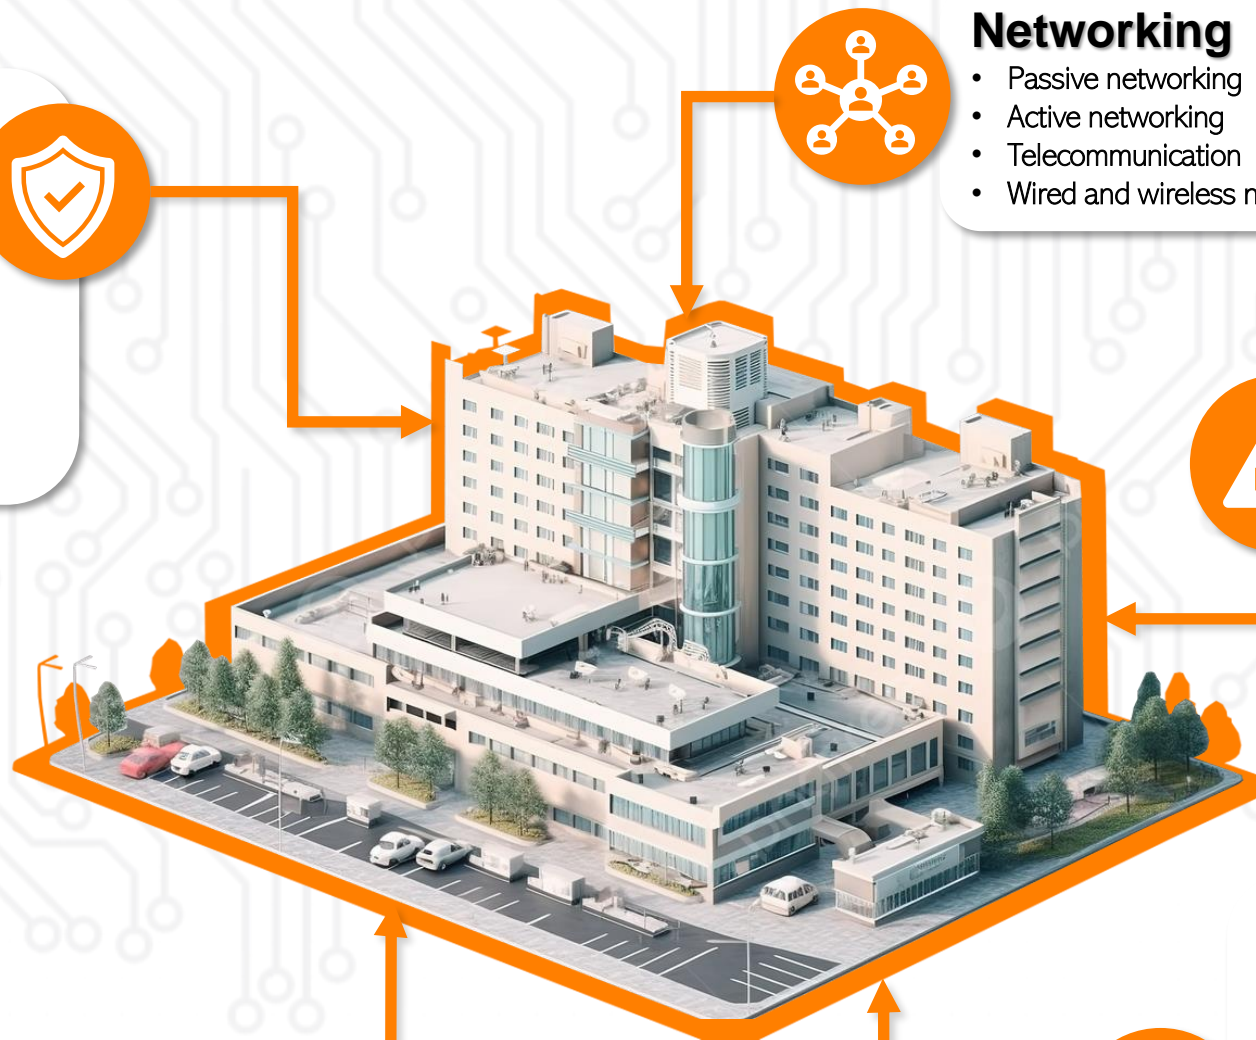

IT Solutions

- Turnkey solutions for
- Datacenter Solutions
 - Wired and wireless Campus Networking
 - Hospitality management services
 - Real time tracking services (RTLS)

Audio Visual

- Classroom/Collaboration services
- Auditorium and board room solutions
- PA System
- Video Conferencing solution
- Digital signages and video walls

Networking

Passive Networking

MNC offers a wide range of passive network solutions, and we are also leaders in Optical fibre-based solutions. After commissioning we provide test reports drafted from certified equipment.

Fibre Optics and more

We work with optical fibre, CAT 6A and all other types of passive medium.

Certified Team

Our trained and certified inhouse team will do the installation, testing and commissioning.

Rooting Design

We have engineers inhouse to design the optimum solution for your needs and requirement.

Certified Test Equipment

We have certified test equipment to provide the most accurate results.

Active networking

MNC is a partner for almost all the leading OEMs that make active network components. We are a single point contact for all your end-to-end networking requirements.

Qualified Designers

Our team consists a group of well-seasoned designers who can tailor your solution.

Transportation

We have our own cargo fleet and an experienced team to manage logistics.

Site Engineers

Our site engineers will install, test, commission and provide any training required to the user.

After Sales

After the site is live, we support the operation remotely and visit if required.

Telecommunication

Communicating within an office is key to running a business. This communication can be achieved through various ways. We offer a variety of telecom solutions from traditional 2 pair voice cabling to IP EPABX

Network Audit

We use tools like Ekahaun and Netvalley to validate the efficiency of the wireless network. We use High end network cable testers like Fluke MS2-100-IE to check Wired networks

IT solutions

To fully secure a facility, multiple systems need to work parallelly to be fully optimised. Our team has implemented thousands of solutions are also maintaining a lot of them.

Data Centre Solutions

MNC offers end to end data centre solutions. We are the authoriser integrator for several international OEMs.

Tier 4 Data Centres-

Our inhouse expert team has successfully flagged off more than 100 Tier 4 data centres.

PAC – Precision Air Conditioners

We also integrate PAC systems with data centres for optimum performance

Wired and wireless campus network solutions

We provide both wired and wireless campus network solutions to colleges, offices, hotels and other premises which might need.

Simulation before Installation

Our team will simulate the Wi-Fi network and thus will draft the optimum BOQ for the site

Secure Networks

While we design the network, we keep cyber security in mind and draft only safe solutions

Hospitality management services

We have a range of solutions for our customers to engage with their clients seamlessly.

Parking Management Solutions

We offer automatic parking fee collecting, parking space locator and display, reserved parking system.

Visitor Management Solutions

We offer a variety of VMS based of different technology like RFID, QR code and BLE

Indoor location services

Navigating through a big facility can be daunting. We offer Indoor location services with real time tracking accurate up to 1 m

Real Time Tracking Services (RTLS)

We offer warehouse management systems for tracking of goods. We also have systems to track permanent asserts inside your premises.

Cybersecurity

© 2023, Madras Networking Company. All Rights Reserved. Restricted use

According to OSI network model there are 7 layers where security will be needed. We can draft a solution that is not only secure but also optimum for your business needs. We have worked with various organizations with various criticality levels. We are also QMS certified for Cybersecurity (ISO 27001)

Perimeter Security

This is the first line of Defense for an Organization's Corporate Network, Data Center and Disaster Recovery Center. We Provide firewalls and other network access control products to tighten your organization's security

Endpoint security solutions

New Malware and sophisticated Attack Methodology render "the traditional Anti-Virus" ineffective. Our range of EDR/Endpoint Detection Response solutions help organizations to fight against sophisticated and unknown malware.

Secure remote access solutions

Organizations require protection of its users in office as well as at home. The minimum requirement of such protection is Secure Access to Internet, Secure Access to Data Center Resources and Seamless Access to Cloud Resources.

Application security

We provide solutions which can detect and prevent threats on both Server and Client-side applications.

Email and web security

Malware via Email and Web contribute to a major portion of the threat an organization faces. Strong Anti-Malware and Email encryption are crucial for any Organization.

Log Analysis & Infrastructure Monitoring

We offer solutions that detect threats in the logs and flows collected from Servers, Network Devices, Security Devices and OT devices.

Vulnerability Management

Continuous Identification of Vulnerabilities, across the IT Infrastructure including On-Prem and On-Cloud is mandatory and is key in being a step ahead before an attacker exploits a vulnerability.

Physical security

To fully secure a facility, multiple systems need to work parallelly to be fully optimised. Our team has implemented thousands of solutions are maintaining them.

Access Control system

Our Team will design, supply, install, commission and test the whole system. We can also do any custom dashboard for overview.

RFID based

RFID technology is the most used access control technology. It is also relatively secure

QR Code based

QR code is a relatively new technology. It has the cheapest running cost of all Access Control systems

Mobile Access

Access cards can be stored onto your mobile phone. The key data is dynamic making the system very safe. The key can be a dynamically generated QR code or can also be an NFC signal. There are also Bluetooth based solutions.

Gas based fire suppression system

Using water as a fire suppressant in areas where electronics operate, and irreplaceable high-value assets are stored could be as devastating as fire itself. We have gas suppression system in several data centres

CCTV and IP surveillance

We provide a wide range of cameras for a variety of application. We work out end to end solution for all your surveillance needs.

Thermal Camera

These cameras sense heat. They are used to detect wildlife and other also humans

Night vision Camera

Cameras that can give a clear image even during the darkest nights

Long range Camera

Used for outdoor surveillance. Can monitor a long distance.

All weather Camera

Used in places that are exposed to the elements. Like traffic signals etc.

Fire Alarm System

We provide, zonal and Addressable fire alarm system. Our certified team will design the optimum solution for your facility. We also have IP based Fire alarm panels

Audio Visual

To fully secure a facility, multiple systems need to work parallelly to be fully optimised. Our team has implemented thousands of solutions are maintaining them.

Classroom / Collaboration Solutions

We provide solutions that makes classrooms more interactive and corporate communications more effective and seamless.

Interactive displays

These displays have Live annotations, inbuilt desktop, ability to pushing content from multiple sources and more features.

Interactive projectors

These projectors can make any surface a touch screen with the help of a stylus. They also have live annotations.

PA System

Public address systems are essential for any commercial building. We provide a wide range of PA solutions that can be tailor made for your application. We provide multi-channel PA systems and now IP based PA systems are also available

Video conferencing solutions

In the era of the global village, remote communication is the key to thriving. We have state of the art video conferencing solutions to enhance all your remote communication needs

Auditorium and Board Room Solutions

We offer state of the art auditorium solutions for educational institutes, corporate offices and even for corporate board rooms.

Audio tuning

We working with industry leaders to give the highest quality audio output. Our trained team will tune the audio for your premise

Automatic Voice pick up

When in questionnaire mode, and a person speaks, the roof mounted mics will pick up their audio and elevate it without a handheld or a tabletop microphone.

Smart Podium

Our podium solutions offer a seamless experience for the speaks to share content, annotate on the content or even pull a white board.

Digital Signages and Video walls

Smart Signages

When you have multiple facilities and want to push the same content from a centralised location, smart signage is the way to go.

Modular Video wall

Our modular video wall solutions not only enables custom aspect ratios, but also can be of any shape.
